1 Introduction

1.1 Background

The rising electricity tariffs in South Africa, combined with the increasingly severe load shedding patterns experienced across the country, has a negative impact on the production and revenue of Samancor Chrome business. Climate change is also a concern for Samancor Chrome referring to the emissions of greenhouse gases (GHG) in the use of fossil fuel electricity. This has motivated Samancor Chrome to consider renewable energy generation at their smelter plants. Implementing solar Photovoltaic (PV) generation will result in improved availability of supply and reduced utility bills as well as going 'green' in terms of environmental considerations.

In October 2023, Notice was given in terms of the EIA Regulations, 2014 (as amended) published in Government Notice Regulation (GNR) 324 - GNR 327, in terms of Section 24(5) of the National Environmental Management Act - NEMA (Act No. 107 of 1998) (as amended) and the National Water Act – NWA (Act No. 36 of 1998) (as amended) of the initiative by TFC Solar (Pty) Ltd, to apply for an environmental authorisation for a 40MW Photovoltaic (PV) Plant across Sites 2B, 3B, 3C, 4B and 5B associated with the Tubatse Ferrochrome Plant, Steelpoort, Fetakgomo Tubatse Local Municipality. An EIA study was initiated, and the final Environmental Scoping Report was accepted by the Limpopo Department of Economic Development, Environment and Tourism (LEDET) on 31 January 2024.

1.2 Scope of the Environmental Impact Assessment Report

The subject of the Environmental Impact Assessment Report (EIAR) includes the following key components:

- Development of a PV plant over the selected potential sites including mounting structures, inverters, on-site transformers and substations, instrumentation and control; and
- Ancillary infrastructure such as internal access roads, powerlines, fencing, gates and access control.

1.3 Public Participation Process

Public Participation (PP) is a process that is designed to enable all interested and affected parties (I&APs) to voice their opinion and/or concerns which enables the practitioner to evaluate all aspects of the proposed development, with the objective of improving the project by maximising its benefits while minimising its adverse effects.

The PP Process must adhere to the requirements of Regulations 39 - 42 (GNR 982) as amended. Further, a PP guideline in terms of NEMA was issued by the Department of Forestry, Fisheries and the Environment in 2017, of which provisions will also be implemented.

The PP Process for proposed project will be undertaken according to the stages outlined below as well as the requirements for the stakeholders.

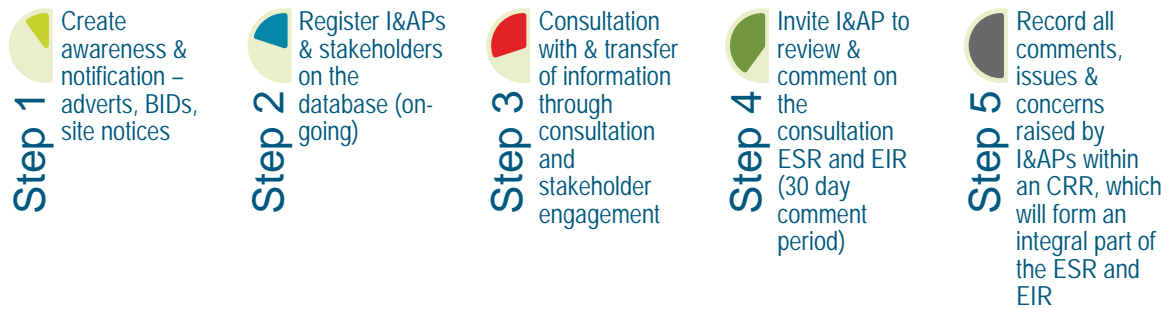

Figure 1-1: Steps in the public participation process

1.4 Purpose of the Report

The key purpose of this PP Summary Report is to:

- Summarise the PP Process undertaken for the Environmental Scoping Study (ESS) as well as the EIA Study to date;
- Synthesise the issues and concerns identified by I&APs and various stakeholders during the circulation of the draft consultation Environmental Scoping Report (ESR) and draft consultation EIA Report (EIAR) from registered I&APs and organs of state which have jurisdiction in respect of the proposed activity and adequately address these in the final EIAR.
- To provide proof of correspondence with the various stakeholders. Where the EAPs are unable to obtain comments, proof has been submitted to the Department of the attempts that were made to obtain comments.
- Provide a Comments and Response Report (CRR) that incorporates all comments for the development.

1.5 Terms of Reference for Public Participation

The terms of reference for the implementation of a successful and robust PP Process, are as follows:

- Identification of I&APs in the vicinity of the study area;
- Provision to all I&APs of an opportunity to comment or raise concerns regarding the project;
- Maintenance of procedures for communication with I&APs and receiving, documenting and responding to relevant communication from I&APs;
- Identification and elimination of any sources of misunderstandings between the Applicant, EAP and the I&APs;
- Always aim to improve the communication between the Applicant, EAP and I&APs;
- Present the project in an objective way by supplying all appropriate, relevant and accurate information and facts in an unbiased manner to ensure a better understanding of the proposed project; and
- Ensure that the PP Process is an independent and transparent process.

2 Identification of I&APs

The first step in the PP Process entailed the identification of key I&APs and Stakeholders, including: Local and provincial government;

- Affected and neighbouring landowners; and
- General I&APs.

An I&AP database (Appendix A) and Proof of notification (Appendix B) has been compiled which has been maintained and updated throughout the duration of the Scoping and EIA study.

In accordance with the Protection of Personal Information (POPI) Act, 2013 (Act No. 4 of 2013), all identifiable information relating to the stakeholders will not be shared with the publicly accessible documentation i.e. uploaded on the website or provided in the hard copies available during the public participation period.

3 Site Notices

The NEMA EIA Regulations 2014 (as amended) require that a site notice be fixed at a place conspicuous to the public at the boundary or on the fence of the site where the activity to which the application relates is to be undertaken and on any alternative sites. The purpose of this is to notify the public of the project and to invite the public to register as stakeholders and inform them of the PP Process. Site notices were erected at various noticeable locations around the perimeter of the site and at strategic locations on or near the site (Steelpoort Post Office, Mapodile Library, Entrance to Sites 3B, 3C & 4B next to the R555, Site 5B fence next to the R555, Entrance to Site 2B, AGS Steelpoort Church and Tubatse Chrome Club).

Table 3-1: Site notice placements co-ordinates

No	Site Notice Placements	Co-ordinates
1	Steelpoort Post Office	24° 43' 53.8" S 30° 12' 21.8" E
2	Mapodile Library	24° 43' 52.2" S 30° 08' 01.0" E
3	Entrance to Sites 3B, 3C & 4B next to the R555	24° 44' 35.4" S 30° 11' 13.0" E
4	Site 5B fence next to the R555	24° 44' 24.4" S 30° 11' 32.8" E
5	Entrance to Site 2B	24° 44' 16.7" S 30° 12' 15.7" E
6	AGS Steelpoort Church	24° 43' 36.7" S 30° 12' 15.6" E
7	Tubatse Chrome Club	24° 47' 42.7" S 30° 09' 58.8" E

4 Background Notification Document

A BID that contained the project brief (Appendix C) for the project was compiled in English. The aim of this document was to provide a brief outline of the application and the nature of the development. It is also aimed at providing preliminary details regarding the Scoping and EIA study and explains how I&APs could become involved in the project. The document was distributed to all identified I&APs and stakeholders, together with details of the Public Participation Consultant.

5 Advertisement

In compliance with the EIA Regulations 2014 (as amended), notification of the commencement of the Environmental Scoping Study for the project was advertised in one local newspaper, the Steelburger Newspaper on the 2nd of November 2023 in English (Appendix D).

An advert for the EIAR phase was placed in the Steelburger, on the 21st of March 2024 in English proof has been provided in Appendix D.

I&APs were requested to register their interest in the project and become involved in the study. The primary aim of this advertisement was to ensure that the widest group of I&APs possible are informed and invited to provide input and questions and comments on the project. I&APs will also be notified of the availability of the draft EIAR for review and comment.

6 Review of the Draft Environmental Impact Assessment Report (EIAR)

The draft EIAR was made available for authority and public review for a total of 30-days from the 27 March – 30 April 2024.

The report was available at the following public locations within the study area, which are all readily accessible to I&APs:

- Mapodile Public Library;
- Burgersfort Public Library;
- Tubatse Ferrochrome Smelter offices; and
- Electronically on the Royal HaskoningDHV Website:
<https://www.royalhaskoningdhv.com/en/countries/south-africa/environmental-reports>

7 Comments and Responses Report

The issues and concerns raised during the ESR phase has been compiled into a Comments and Response Report and presented in Table 7-1 below, the comments raised during the EIAR phase will also be included in this table:

Table 7-1: Comments and Responses

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
Scoping Phase Comments and Responses		
<p>11 October 2023 Email Correspondence Eskom Transmission Division</p>	<p>Please find attached Eskom requirements for work at or near Eskom servitudes and infrastructure, as well as a setbacks guideline for RE Developments. Please send me a KMZ file of the proposed development areas and possible grid connection.</p>	<p>EAP: Documents have been provided to applicant and the IPP, who will take into consideration the requirements and comply where applicable.</p> <p>The kmz file was provided to Mr Geeringh on 07 December 2023.</p>
<p>06 November 2023 Email Correspondence SANRAL</p>	<p>This email is an acknowledgement of receipt for your enquiry. Please note that in line with requirements of Section 29 of the Spatial Planning and Land Use Management Act (Act No 16 of 2013) read with Section 3 of the Promotion of Administrative Justice Act (Act No 3 of 2000) SANRAL have 30 days to acknowledge receipt of your application and 90 days to evaluate and provide response.</p> <p>Should you not receive any response within 120 days, kindly follow up on the enquiry by responding to Dimitri Alben who will be dealing with it and will convert back to you. He can be contacted on (012) 426-6203 / Cell 081 010 6403.</p>	<p>EAP: Please note that this is not a SPLUMA Process, but an EIA process as stipulated as per the EIA Regulations, 2014 (as amended), Section 21-22 of the EIA Regulations prescribes the timeframes in which a Scoping Report needs to be submitted to the Competent Authority which in the case of this application is the Limpopo Department of Economic Development, Environment and Tourism (LEDET). Further to this Section 40 of the EIA Regulations states that all Interested and Affected Parties (I&APs) must be given 30 days to provide comments on draft reports from the 07 November 2023 – 06 December 2023.</p> <p>This application for Environmental Authorisation (EA) for the 40MW PV Plant is not related to the 90 days review and comment period for the SPLUMA application process. The application for EA will lapse if the EAP does not adhere to the mandatory timeframes i.e. 44 days to submit a final Environmental Scoping Report to the LEDET after an application has been lodged.</p>

Project related

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		<p>Please can you provide comments within the specified 30-day review and commenting period from 07 November 2023 – 06 December 2023.</p>
<p>08 November 2023 Email Correspondence SANRAL</p>	<p>Please note that Victoria Bota (botav@nra.co.za) is SANRAL's environmental specialist. We only dealing with Statutory matters, thus the 120 days.</p>	<p>EAP: An email was sent to Ms Bota on 08 November 2023 requesting comments on SANRAL's behalf.</p> <p>The email indicated the following: We have been appointed by Samancor Chrome as the Environmental Assessment Practitioner and Public Participation Consultant to conduct the environmental processes for the aforementioned project. We have been liaising with Mr Hannes van der Merwe and Ms Ria Barkhuizen, as SANRAL is an I&AP for this EIA process, Ms Barkhuizen has indicated that as you are the environmental specialist you will be dealing with this aspect of providing comments as she just deals with the SPLUMA process which is 120 days but that does not impact our process as we are dealing with the EIA Regulations, 2014 as amended which provides stakeholders and I&APs 30-days to provide comments.</p> <p>The draft Environmental Scoping Report for the above-mentioned project is now available for review and comment from the 07 November 2023 – 06 December 2023. Please provide comments on or before 06 December 2023 on behalf of SANRAL.</p>
<p>09 November 2023 Email Correspondence Southern Sphere Platinum</p>	<p>In order for Southern Sphere not to object to a 40MW PV plant located adjacent to its mining activities, we would require a commitment from TFC Solar (Pty) Ltd, covering:</p> <ol style="list-style-type: none"> 1. Recognize that our mining activities (including blasting) will at times be contiguous to the Solar PV 	<p>Applicant: As mentioned by Southern Sphere Platinum, an indemnity commitment aligned with the above was provided for the initial PV plant. For clarity on this matter, the indemnity commitment covers the areas</p>

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
	<p>Plant and that Southern Sphere and their directors, employees and/or duly appointed contractors “representatives” may be unable to ensure that those activities will not negatively impact the Solar PV Plant and/or its associated infrastructure.</p> <p>2. Recognize that the Southern Sphere support is on condition that, TFC Solar (Pty) Ltd (i) confirms it is aware of the proposed prospecting and mining activities to be undertaken by Southern Sphere and the close proximity of those activities to the planned site for the Solar PV Plant; (ii) undertakes to support the prospecting and mining activities of Southern Sphere regardless of the proximity of those activities to the proposed plant, and (iii) provides indemnity to Southern Sphere in respect of all and any damages or losses that TFC Solar (Pty) Ltd may suffer as a result of the permitted mining and or prospecting activities.</p> <p>An indemnity commitment aligned with the above was provided for the initial PV plant.</p> <p>I would like to request that TFC Solar (Pty) Ltd legal representative contacts our legal representative (Ben Graham – cc’ed in on this email) to draw up and sign an applicable indemnity agreement.</p> <p>I reserve the right to submit additional comments into the EIA process.</p>	<p>already approved for the 60MW project (Ref 14/12/16/3/3/2/2079). The current EIA (40MW) does not include any areas adjacent to the proposed mining activities of Southern Sphere Platinum and the areas covered in the said indemnity commitment that is already in place are at all times located between the current EIA sites and the proposed mining areas.</p> <p>See attached picture(s): “20231206 - Solar PV Plant.pdf” showing the areas for which indemnity commitment was reached, as well as the location of the proposed Southern Sphere mining activities, previously indemnity commitment areas, and the new areas applicable to the 40MW project.</p>
<p>10 November 2023 Background Information Document Comment Sheet via Email Sekhukhune District Municipality</p>	<p>Comprehensive waste management plan during and throughout the operations of the plant.</p>	<p>Waste management will be handled through the Environmental Management Programme (EMPr) to be developed during the EIA phase of the project which will include measures on the handling, storing and disposal of waste considering both the construction and operational phases of the development. The draft EMPr will be made available</p>

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		to the Department for comments during the review and commenting period for the Draft EIA Report expected in March 2024.
<p>21 November 2023 Letter correspondence via Email Department of Forestry, Fisheries and the Environment Directorate: Biodiversity Mainstreaming and EIA</p>	<p>The Directorate: Biodiversity Conservation has reviewed and evaluated the reports and does not have any objections the draft Scoping Reports and Plan of Study for EIA. Kindly note that the EIA report must comply with the procedures for the assessment and minimum criteria for reporting on the identified themes in terms of Section 24(5) (A) and (H) and 44 of the National Environmental Management Act, 1998.</p> <p>The Environmental Impact Assessment report must comply with all the requirements as outlined in the Environmental Impact Assessment (EIA) guideline for renewable energy projects and the Best Practice Guideline for Birds and Solar Energy for assessing and monitoring the impact of solar energy facilities on birds in Southern Africa.</p>	<p>The DFFE Environmental Screening Tool has been generated for the project and the subsequent Site-Specific Verification Report has been compiled to validate themes presented in the Draft Environmental Scoping Report which has been provided as Appendix C to the Environmental Scoping Report. The specialist studies will comply with Government Notice No. 320 of 20 March 2020 (i.e. "the Protocols"), and Government Notice No. 1150 of 30 October 2020.</p> <p>The EIA Report will comply with the Guideline for Renewable Energy Projects as well as Appendix 3 and 4 of GNR 326 of the EIA Regulations 2014 (as amended).</p> <p>The Avifaunal Impact Assessment will comply with the BirdLife South Africa: Guidelines for Assessing and Monitoring the Impact of Solar Power Generating Facilities on Birds in Southern Africa (2017).</p>
<p>28 November 2023 Email Correspondence Lebalelo Water User Association</p>	<p>The Association has submitted its comments these include.</p> <ol style="list-style-type: none"> 1. Regarding the use of water and noting that Samancor will be using its own resources (See 2.2.3 of the Report "Water will be obtained from the TFC process and no raw water sources will be required"). 2. At para 2.2.1 the report states "the solar fields will connect to the Tubatse East- and West Substations by means of power corridors to evacuate the AC power. The power corridor will comprise of overhead lines or underground cables, or a combination thereof, at a voltage level of 33kV". The Association has pointed out that one of the power corridors crosses 	<p>Applicant: It is confirmed that Samancor will be using its own resources, specifically "Water will be obtained from the TFC process and no raw water sources will be required".</p> <p>It is further confirmed that Samancor is in discussions with Lebalelo Water User Association regarding the overhead lines to evacuate the generated power from Site 5 that has previously been awarded an EA (60MW project). The current EIA (40MW) will not result in any additional</p>

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
	<p>the Association's raw water pipeline and concerns were raised regarding possible interference with the Association's cathodic protection of the pipeline. This has been discussed with Samancor and other representatives.</p>	<p>overhead lines that need to cross the raw water pipeline and will make use of the powerline associated with the 60MW project.</p>
<p>29 November 2023 Email Correspondence Sekhukhune District Municipality</p>	<p>Please note that the SANS 10400 Section A 9 Fire Plans will be required as well as a design by a competent person in fire should there be a need for it due to the risk assessment conducted.</p> <p>The risk assessment and design for the proposed in terms of fire and the impact thereof when involved in a fire and prevention strategy for the 40MW PV plant and proposed design in terms of fire must also be applied for and submitted to Sekhukhune District Municipality Emergency Management services.</p> <p>Also note that Sekhukhune Town Planning division, Health Section will also comment and I have copied them into the communicate. As mentioned, the local building control will guide you on their requirements.</p> <p>During our previous communicate I did send it to my colleagues.</p> <p>Please feel free to contact this Department for any clarity or questions.</p>	<p>Applicant: Samancor takes note and will take into consideration the requirements and comply where applicable. The IPP will be responsible for the submission of the SANS 10400 Section A 9 Fire Plans, as well as the appointment of a competent person responsible for the design (based on the risk assessment).</p>
<p>05 December 2023 Letter Correspondence Limpopo Department of Economic Development, Environment and Tourism</p>	<ol style="list-style-type: none"> Kindly provide a copy of environmental authorisation (EA) issued by DFFE with Reference number: 14/12/16/3/3/2/2079. Considering the number of hectares to be cleared and hard surfaces (solar panels) to be constructed, this may lead to increased runoff and flow velocity. Stormwater management plan must also be developed and attached to the EIAR. 	<p>EAP:</p> <ol style="list-style-type: none"> A copy of the EA is provided in Appendix F of the final ESR. A Stormwater Management Plan will be included as part of the EMPr during the EIA phase. Chemical toilets (gender-specific) will be provided per 15 people which will be serviced a minimum of once every week.

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
	<p>3. An indication must be made as to what the lifespan of the solar panels is expected to be and what the plan is for the materials post that period. This should be addressed as part of waste management plan for the facility.</p> <p>4. The kind of sanitation to be utilised for the facility has not been mentioned.</p> <p>5. Visual impact study must also address glint and glare.</p> <p>6. A copy of newspaper advert as appearing in the publication has not been provided.</p> <p>7. Measures to safeguard riparian zones and address associated ecological consequences must be implemented.</p> <p>8. Buffer zones around water bodies and tributaries must be established.</p> <p>9. Species present on the development site must be identified and documented.</p> <p>10. Mitigation measures to preserve the river corridor function must be developed.</p> <p>11. You are required to submit one (1) hard copy and one (1) soft copy (USB) of Scoping Report (SR) which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including comments of the competent authority to the Department for consideration, within 44 days of receipt of this application by the Department.</p> <p>12. Kindly bring to the attention of the applicant that the development must not be commenced with prior to the Department deciding on the application.</p>	<p>4. The life span for the solar module is 30 years. As the panels are classified a hazardous waste, the disposal of the panels will be according to waste legislation and waste disposal followed by TFC to a licenced hazardous waste facility. The waste will not be disposed of into any landfills within the Sekhukhune District Municipality and no additional burden will be placed on these landfills.</p> <p>5. As the study area has been verified to have a low degree of visual sensitivity through a site verification exercise, a Visual Compliance Statement will be compiled that will consider the visual context of the study area and will consider receptor-based visual impacts, in particular related to the elevated southern parts of Site 2B. Impacts related to glint and glare will also be addressed in the Visual Compliance Statement.</p> <p>6. The proof of the advert placement has been included in Appendix E - Public Participation Summary Report.</p> <p>7. A 20m development exclusion buffer has been applied to all freshwater ecosystems in the study and investigation area in line with a previously conducted buffer study for freshwater ecosystems in the investigation area. Further impact-specific and site-specific mitigation measures to reduce or avoid such potential impacts on freshwater ecosystems will be incorporated into the EMP that will be submitted during the EIA phase.</p> <p>8. Section 5.6.4 and Figure 5-15 of the Environmental Scoping Report provides a description of the buffer zones required for the water bodies and tributaries. A 20m development exclusion buffer has been applied</p>

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		<p>to all freshwater ecosystems in the study and investigation area in line with a previously conducted buffer study for freshwater ecosystems in the investigation area. The 1:100 year floodline has also been delineated.</p> <p>9. Species have been identified through the various site assessments. The identification of species will continue during the EIA phase and a comprehensive list will be included in the EIA phase Biodiversity Report. The need for permits from DFFE (for protected trees) and LEDET (for protected plants) will also be included in the report and EMPr.</p> <p>10. Mitigation measures will be incorporated into the Environmental Management Programme that will be submitted during the EIA phase. One hard copy and soft copy (USB) will be provided to the Department. The draft ESR has been subjected to a 30-day public participation from the 07th of November 2023 - 06th of December 2023, all comments received to date has been included in this Comments and Response Report.</p> <p>11. The Applicant has been advised that the activities may not commence prior to receiving an EA from the Department. A statement to this effect has been included in Section 9 of the ESR.</p>
<p>07 December 2023 Email Correspondence Lebalelo Water User Association</p>	<p>I am not sure if the Association can grant your client a wayleave to construct a powerline to evacuate power from the PV site over the Association's pipeline until such time as appropriate due process and governance has been complied with.</p>	<p>Applicant: Samancor is currently busy with the wayleave process and have been engaged in discussions with the Department of Water and Sanitation and the Trans-Caledon Tunnel Authority regarding the evacuation of the powerline over the pipelines. This</p>

	How was the 20m buffer around the freshwater features determined and why was the 32m as prescribed in the EIA Regulations, 2014 (as amended) not used.	<p>EAP: The Freshwater specialist applied a scientific buffer guideline tool to the freshwater systems which was used to determine a more accurate buffer that would still protect the freshwater systems but also maximise the area for the development of arrays.</p> <p>The 32m as stated in the EIA Regulations, 2014 (as amended) is what is described as a Zone of Regulation whereby any activity occurring within this 32m will need to obtain environmental authorisation before the activity can commence. The 20m buffer as prescribed by the Freshwater Specialist is a development exclusion zone.</p>
	Was a Biodiversity Offset compiled for the project and what was the recommendation from the authority.	<p>Applicant: An offset strategy was developed for Phase 1. In the permit conditions, the DFFE recommended a 1:3 offset ratio and that they will provide the beneficiaries and the areas where trees will be planted.</p>
	Southern Sphere Mine has no objection to the proposed project and will submit an official response.	<p>EAP: The EAP thanked Mr Buys for his participation and indicated that the review period ends on 30 April 2024 and any and all comments, questions and queries should be forwarded to the EAP timeously.</p>

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
	<p>Southern Sphere are in the process of undertaking several specialist studies for their project, which lies adjacent to the proposed 40MW PV Plant areas. As a result, I have a good baseline environmental and social knowledge about the area. My comments below have been raised through using my baseline knowledge and I trust they add value to the EIA process.</p> <p>Thank you in anticipation of capturing and considering my feedback provided.</p>	
	<p>Traffic impacts: Has a traffic impact assessment (TIA) been completed for the EIA? Based on a TIA we have recently undertaken there are a number of intersections already under pressured as a result of existing traffic levels. There is a potential that the traffic associated with the project may have a significant impact on the R555 and existing intersections. The potential impact and appropriate mitigation measures would be determined through completing a TIA.</p>	<p>EAP and Applicant: No TIA has been conducted for the project and further to this no TIA has been identified as a specialist assessment according to the DFFE Screening Tool for the PV Project. Further to this no TIA was required for Phase 1 or Phase 2 by the Competent Authorities.</p> <p>Based on the TIA that Southern Sphere have undertaken, the nature and significance of impacts associated with a new and operational mine is assumed to be significant throughout the life cycle of the mine.</p> <p>The Solar PV plant will only have delivery of panels and structures to laydown areas applicable during the construction phase which extend over a 12 - 24 month period. Deliveries by truck will be periodical in nature.</p> <p>SANRAL is a key stakeholder on the project and have been notified of both phases of the project. During Phase 1, SANRAL were concerned about access off the R555 and preferred that existing access roads are used. No new access points off the R555 are proposed for the project. Traffic management outcomes and objectives including</p>

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		<p>impact management actions are included in the PV Plant EMPr.</p>
	<p>Biodiversity impacts: I took note of the following conclusions made in the specialist biodiversity assessment:</p> <p>“Portions of the proposed sites are considered diverse and sensitive, and retaining these areas for conservation purposes is highly recommended, although technical considerations for the proposed development might not allow for much mitigation in this sense. The presence of numerous and abundant conservation important plant and animal species, which provides for an elevated ecological sensitivity and importance of certain parts, are noted throughout the study areas. An existing offset plan has been prepared for Phase 1 of the project; it is strongly recommended that previous recommendations be augmented to compensate for the loss of these sensitive areas, should the authorities grant the application.”</p> <p>Please advise how the existing offset plan has been augmented to compensate for the loss of sensitive areas associated with this project.</p>	<p>EAP and Biodiversity Specialist: The magnitude of mining activities on the terrestrial biodiversity environment will definitely be more significant compared to a PV development. While loss of habitat is from the actual activities are largely in the same bracket, for mining you also need to consider activities such as excavation, storage heaps, water accumulation issues, haul roads, blasting and disturbance factors, rehabilitation requirements and potential success, etc. Once completed, a PV development is largely inactive and ‘inert’, or passive, compared to persistent and continued high level activities associated with mining.</p> <p>The existing offset strategy has not yet been amended to allow for loss of habitat from this Phase of the development, the Biodiversity Report only recommends an amendment of the strategy. Changes to the strategy will, most likely, related to an appropriate amendment in the recommended size of land, or an increase in the monetary value of the compensation, in the event that it is requested by the Competent Authority. Further to this, an Offset Plan was not required for Phase 1 of the project.</p> <p>Samancor is preparing a Biodiversity Management Plan (which will be drawn up over a two-year period using the Locate-Evaluate-Assess-Prepare [LEAP] approach as well disclosure recommendations and guidance set up by the Taskforce on Nature-related Financial Disclosures (TNFD) as to compensate for any losses.</p>

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
	<p>Surface Hydrology/floodlines: A significant portion of “extension 4” will be located within a flood inundation zone. Developing within the flood zone is a risk. There is a recommendation to construct a 3.5 to 4m precast wall to divert any flood water away from the extension 4 area. Has this wall been captured within the visual impact assessment? How does the change of flow path, as a result of the proposed wall impact the R555? Are the existing culverts / “bridge” adequate for the proposed change to flow path and peak flow intensity created by the storm water controls?</p> <p>Southern Sphere have recently completed a detailed floodline for our project and when comparing our specialist study to your study, the following stood out;</p> <ul style="list-style-type: none"> ▪ The Mean Annual Precipitation (MAP) used seemed low compared to what other specialist are using. Has a sensitivity analysis using other MAP being done? ▪ The accuracy of the Digital Terrain Model (DTM) used seems very coarse and may result in coarse estimates of the floodlines. As flooding is a real risk specifically for extension 4 would it not be better to obtain site specific data through obtaining a suitable lidar survey and then rerunning the floodline assessment? ▪ Has the impact of the Tubatse dam (located directly upstream of the project) been considered in terms of determining the floodlines and has a dam break analysis being completed to determine the risks on the project? <p>FYI, we completed a dam break analysis of the De Hoop Dam and can confirm that in the extremely unlikely event of a failure of the De Hoop Dam, Site 5 would be severely impacted by flood water.</p>	<p>EAP and Hydrologist:</p> <ul style="list-style-type: none"> ▪ The 3.5 to 4m precast wall is one of the recommendations made by the Hydrologist to protect panels should the Applicant decide to place panels in the inundation zone. An alternative recommendation is to mount the panels approximately 5m high, as the floodwaters will be approximately 4m in depth where the panels are closest to the drainage line. Then there is no obstruction or alteration of the flow regime in the drainage line and the bridge would function as intended). The detail design will determine which of the recommendations will be implemented and the necessary water use authorisation process will be undertaken. ▪ The Visual Compliance Statement has taken the precast wall recommendation into consideration. Firstly, the wall would be located on the edge of the Site 4B development and in relatively close proximity to the drainage line. Accordingly, the wall would form part of the expanded solar development as viewed from public access areas, the closest of which is the R555 road to the north of Site 4. Due to its landscape position in a valley, the wall would not be a prominent feature by virtue of its position in the valley bottom, and viewers on the R555 road would view the wall within the enclosed setting of the valley through which the drainage line runs. Secondly, the height of the wall is slightly lower than the average height of the panels which is 5m. The wall will thus not exceed the height of the panels, and a

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		<p>viewer on the R555 road would be able to view the wall with the panels rising up the valley slopes behind it. If a strip of natural woody vegetation were to be retained in the area between the road reserve and the northern boundaries of Sites 3 and Site 4/4B, this vegetation would assist in partly screening the wall from view. If able to be viewed, it is concluded that the proposed wall would not be visually prominent and would form a component of the altered local landscape context that would result from the replacement of natural vegetation with solar panel arrays.</p> <ul style="list-style-type: none"> ▪ The MAP used by the Hydrologist is deemed correct as GCS used the average of various rainfall stations in the area from a verified and widely used source (i.e. WRC 2012). Further to this, GCS used Design Rainfall (the upper case) for floodline modelling, therefore, the worst-case scenario is represented for the delineated floodlines. Thus, even if the MAP presented might differ from the other specialists, the Design Rainfall used is standardised and is standard industry practice to use according to the Drainage Manual from SANRAL. ▪ Accuracy of the DTM - Samancor commissioned drone surveys for the sites of 0.5m accuracy and this made up the base for the floodline models. This DTM is deemed sufficient for the flood risk analysis. When GCS updated the floodlines to use the higher resolution drone survey data as opposed to the ALOS 30m DTM, the floodlines did not

Project related

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		<p>massively change. They were still in the same order. Therefore, even finer resolution DTM data will not likely bring about vastly different results.</p> <ul style="list-style-type: none"> ▪ Dam Safety Analysis - A Dam Break Analysis is not required for a PV Plant project and therefore has not been conducted.
	<p>Freshwater: Based on an Aquatic specialist study we have recently completed, the proposed 20m buffer for the drainage lines and the Steelpoort River is inadequate to act as a suitable aquatic buffer. I would like to suggest that this Freshwater study is peer-reviewed by an appropriate specialist, and, if an alternative buffer is recommended this is presented.</p> <p>Land claims / Graves: Have you investigated whether there are any land claims on the properties impacted by the project? If land claims exist have the claimants being</p>	<p>EAP and Aquatic Specialist: The 20m buffer for the watercourses on Sites 3, 4, and 5 was determined through the application of the scientific buffer tool, considering the physical characteristics of the watercourses. The 20m buffer as provided by the tool mitigates against the risk of edge effects associated with development of solar panel arrays. The local environment is not characterised by significant volumes of recharge, hence the buffer tool did not need to preserve a wider buffer to mitigate against the loss of such recharge. Finally, the nature of solar panel arrays, having a lesser footprint and impact as compared to developments of much greater footprint and impact – such as mining – was taken into account by the tool.</p> <p>We would like to request a copy of the Aquatic Specialist Study undertaken by Southern Sphere to determine the context of the 68m-wide buffer (as indicated by Mr Buys at the Open Day) and the reasoning and assessment behind such a buffer in the context of the mining operations. The Competent Authority can request a peer review after reviewing the Southern Sphere Aquatic Study.</p> <p>Applicant and EAP:</p>

Project related

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
	<p>appropriately consulted? I noted that a number of graves have been identified and the appropriate procedure has been recommended to be followed should these graves be impacted.</p>	<p>A number of land claims, that were lodged by various claimants, have been published in respect of the properties described as:</p> <ul style="list-style-type: none"> ▪ The Remaining Extent of the farm Goudmyn 337 KT ("farm Goudmyn"); ▪ The Remaining Extent of Portion 1 of the farm Goudmyn; and ▪ Portion 6 of the farm Goudmyn. <p>Samancor have given notice of the intended PV site development in its representations delivered to the land claims commissions on 21 December 2023.</p> <p>Potential burial grounds and graves have been identified and as per the recommendation from the Heritage Specialist, all burial grounds and graves should be retained and avoided with a buffer zone of 30m as per SAHRA guidelines. All recommended buffers have been incorporated into the layout and environmental sensitivity mapping.</p>
	<p>Climate change physical risk assessment: I would recommend undertaking a climate change physical risk assessment to better understand the potential impacts / opportunities climate change may have on the project and how these impacts / opportunities can be appropriated considered in terms of the mitigation hierarchy.</p>	<p>EAP: A Climate Change Assessment was conducted for Phase 1 that considered the climate change impacts associated with a 100MW PV Plant. Impact management actions were included in the approved EMPr. The following was also added to PV Plant EMPr - Section 4.3.4 Environmental Emergency Response - <i>An Emergency Preparedness Plan must be developed and implemented for the operational phase to deal with any climate-related disaster occurrences such as a major floods or water shortage due to prevailing drought conditions. The plan must include emergency contact details, a list of emergency equipment on site and maintenance schedule, emergency operational</i></p>

	subsoil stockpiles as I did not pick this up on any of the plans?	PV field. A Method Statement as recommended in the EMPr for Soil management (including topsoil, subsoils and stockpiles) must be compiled by the IPP's Contractor.
30 April 2024 Email Correspondence South African Radio Astronomy Observatory (SARAO)	Thank you for your email. The SARAO previously issued a response letter for the 40MW Solar facility in the Tubatse Local Municipality. Kindly see the attached letter for your reference.	EAP: Thank you, I have captured those comments during the Scoping phase and noted that there are no additional comments.
02 May 2023 Letter Correspondence Limpopo Department of Economic Development, Environment and Tourism	The EIAR has been reviewed and the following are comments to be addressed: 1. It is noted that a portion of the land earmarked for the development is owned by Goldbroz, kindly provide landowner consent, lease agreement or title deed if the property has been acquired. 2. Kindly confirm that no BESS is associated with this application as the system has already been authorised". 3. Kindly provide proof of consultation with the next-of-kin of the deceased buried on the site. 4. You are required to submit one (1) hard copy and one (1) soft copy of the EIAR (addressing the above issues), which has been subjected to at least 30 days public participation, within 106 days from the date of acceptance of the Scoping Report. 5. Kindly bring to the attention of the applicant that the development must not be commenced with prior to the Department deciding on the application, Please do not hesitate to contact this Department should you have any queries in this respect.	EAP: 1. Landowner consent provided in the Application Form (attached as Appendix C). 2. Confirmed, no BESS has been applied for as part of this application (LEDET Reference: 12/1/9/2-GS88). 3. During the fieldwork for Phase 2, three potential burial grounds with approximately 5 graves (TFC001), 2 graves (TFC004) and 3 graves (TFC005) were found. In Phase 1, Site 2-1 was identified as a burial grounds and graves with 18 graves and Site 2-2, being a potential gravesite. These structures (TFC001, TFC004 and TFC005) are indicated as 'potential' and in a poor condition and are degraded, and a no-go buffer of 30m as per SAHRA guidelines has been provided in the layout. These structures do not have any forms of identification and no next-of-kin have come forward to claim these potential graves. It has therefore been recommended that the structures at TFC001, TFC004, TFC005 and Site 2-2 be investigated through test excavation (if required, post-authorisation) to determine if there are graves. If it is found to be graves these graves including the graves at Site 2-2

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		<p>must be relocated after completion of a detailed grave relocation process, that includes a thorough stakeholder engagement component, adhering to the requirements of Section 36 of the NHRA and its regulations as well as the National Health Act and its regulations. A similar test excavation was done during Phase 1, when members of the Masemola family indicated a grave on Site 5, however, no remains were found.</p> <p>4. One (1) hard and One (1) soft copy will be provided to the LEDET, all comments and issues raised on the project will be included in the Comments and Response Record in Appendix E of the Final Environmental Impact Assessment Report. A thirty (30) day public participation period was provided from the 27th March 2024 to 30th April 2024.</p>
<p>02 May 2024 Letter correspondence via Email Department of Forestry, Fisheries and the Environment Directorate: Biodiversity Mainstreaming and EIA</p>	<p>According to the information provided in the report, most of the proposed development footprint is situated in the Sekhukhune Plains Bushveld and is encountered on the plains and the flat areas around Steelpoort, noticeably with a modified and deteriorated appearance because of anthropogenic disturbances and high utilisation factors. The Limpopo Bioregional Conservation Plan (2018) categorised much of the remaining portions of the natural habitat as ESA1, which is generally considered an accurate and acceptable assessment. Land use within the larger region is decidedly rural, characterised by commercial agriculture and extensive livestock farming.</p> <p>Considering the above, it is recommended that the final assessment report must implement the following recommendations:</p> <ul style="list-style-type: none"> ▪ Development within the highly sensitive areas, especially southern sections of Site 2B, is not 	<p>EAP and Biodiversity Specialist:</p> <ul style="list-style-type: none"> ▪ The project layout plan cannot exclude the southern sections of Site 2B. The motivation is as follows: <ul style="list-style-type: none"> ○ The sensitivity, as indicated in the Terrestrial Biodiversity Report is acknowledged. The presence of several protected species, and the pristine nature of the vegetation contributes to the high sensitivity ascribed to these parts, and the sensitivity is not contested. However, the DFFE Biodiversity Directorate categorised these areas as ‘No Go’, which would generally relate to the area being fatally flawed. It is the Biodiversity Specialist’s interpretation that fatally flawed areas generally

Project related

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
	<p>supported. The project layout plan must set aside this area as a no-go area.</p> <ul style="list-style-type: none"> ▪ The 'no-go' areas of the development property must be clearly demarcated and excluded from the final layout plan. No construction camps, temporary or permanent laydown areas or any activities associated with the development are to be located within the important conservation areas. ▪ Disturbed areas must be rehabilitated as soon as possible after construction with locally indigenous plants to enhance the conservation of existing natural vegetation on site. ▪ A Search and Rescue Plan to remove and relocate protected species identified within the study area must be developed by a professional and qualified ecologist. ▪ Wetlands, rivers and river riparian areas must be treated as 'no-go' areas and appropriately demarcated as such. ▪ Permit from relevant authorities must be obtained prior commencement of any construction activities for the disturbance and removal of any national or provincially protected species. ▪ Alien Invasive Plant Species Management and Rehabilitation Plans must be developed and submitted as part of the final report to mitigate habitat degradation due to erosion and alien plant invasion. 	<p>comprise of, either large expanses of pristine habitat that has a threatened (Endangered, Critically Endangered, etc.) conservation status, or with the known presence of threatened plant and animal species.</p> <p>While these areas do provide habitat for the Mountain Reedbuck, their presence is considered opportunistic, particularly in view of existing mining, smelting impacts from the immediate surrounds. The ecological habitat is currently categorised as Least Concern. The presence of several protected plant species within the site is furthermore considered typical of the larger environment and limited losses, on a regional scale, is anticipated. Ultimately, the results of the assessment indicated that habitat from the site is considered ubiquitous to the wider region and does not constitute critical habitat that is restricted on a local or regional scale.</p> <ul style="list-style-type: none"> ○ From the accepted mitigation hierarchy, an overall Biodiversity Management Plan (which is to be drawn up over a two year period for Samancor properties in the Steelpoort area using the Locate-Evaluate-Assess-Prepare [LEAP] approach, is recommended, to compensate for any biodiversity losses. It should also be noted that the area that will ultimately be affected is also comparatively small.

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		<ul style="list-style-type: none"> ○ The assessment of cumulative impacts indicated a moderate significance. Specifically, the presence of surface mining activities (Gracelica) and the Tubatse Smelter and logistics area immediately adjacent to the proposed site, within habitat that is considered similar to the proposed site in terms of attributes and sensitivity, is mentioned as an important consideration our assessment. A similar consideration should therefore be applied to the proposed PV activity by the Competent Authority. ▪ The 'no-go' areas have been indicated in the sensitivity maps for the project sites which are considered development exclusion zones. These include amongst others – episodic drainage lines (EDLs), heritage buffers, Eskom existing powerline servitudes, Wahlberg Eagle nest. ▪ Rehabilitation of disturbed area has been included in Section 9 of the PV Plant EMPr (Appendix G). ▪ It is stipulated in the EMPr (Section 6.4) that – Prior to the stripping and clearing of the terrestrial habitat within the development footprint/corridor, a search and rescue of indigenous vegetation must be undertaken and relocated to suitable habitat out of the development footprint/corridor. A Plant Rescue and Protection Report must be compiled and must be made available to the LEDET on request. ▪ All applications for licences in respect of protected trees must be obtained from the

Date of Comment, Format of Comment, Name of Organisation/I&AP	Comment	Response from EAP/Applicant/Specialist
		<p>DFFE. Permits for the removal of protected plant species must be obtained from the LEDET.</p> <ul style="list-style-type: none"> ▪ An Alien Invasive Plant (AIP) Management Plan has been included in the Terrestrial Biodiversity Report (Section 41.2), this plan has been extracted and attached as Annexure C of the PV Plant EMPr. The Post-construction and Rehabilitation Plan is included in Section 9 of the PV Plant EMPr.
<p>06 May 2023 Letter Correspondence SAHRA</p>	<p>The following comments are made as a requirement in terms of section 3(4) of the NEMA Regulations and section 38(8) of the NHRA in the format provided in section 38(4) of the NHRA and must be included in the Final EIAR:</p> <ul style="list-style-type: none"> a) 38(4)a – The SAHRA Development Application Unit (DAU) has no objections to the proposed development; b) 38(4)b – The recommendations provided by the heritage specialists are supported and must be adhered to. These further additional comments apply: c) The Chance Finds Procedures in section 6.2 and the management plans in table 9 of the HIA must be implemented; d) A Fossil Chance Find Protocol should be added to the EMPr; e) A 30m no-go buffer zone around sites TFC002-1 – TFC002-8 must be implemented to avoid potential infant burials; f) The sites Site 2-1, Site 2-2, Site 2-4, TFC001, TFC004, and TFC005 must be fenced with a 30m buffer zone; g) A social consultation process in terms of in terms of Chapter XI of the NHRA 2000 Regulations must be undertaken, to identify the descendent families of the burials at the aforementioned site and 	<p>EAP:</p> <ul style="list-style-type: none"> a) SAHRA's no objection to the project is noted. b) The recommendations provided by the heritage specialists are included in the final EIAR and EMPr. c) The Chance Finds Procedures in section 6.2 and the management plans in table 9 of the HIA have been integrated into the EMPr. d) The Fossil Chance Find Protocol has been added to the Annexure D of the PV Plant EMPr. e) A 30m no-go buffer zone has been demarcated around sites TFC002-1 – TFC002-8. f) The sites Site 2-1, Site 2-2, Site 2-4, TFC001, TFC004, and TFC005 have been demarcated with a 30m buffer zone and will be no-go areas and fenced and investigated further. g) A social consultation process in terms of in terms of Chapter XI of the NHRA Regulations (2000) must be undertaken, only if the structures are confirmed to be graves as for now only indicated as potential graves, to identify the descendent families of the burials at the aforementioned sites. Thus far no next-of kin, have claimed any of the potential or actual graves during the EIA process. The overall site will be fenced off as this is private property

Hi

Thank you for the email, I will add you to the register.

The BID is the current information on the project we are still in the early stages of the project and are currently starting with the scoping phase, once the documents are available for review we will let you know.

Regards
Seshni

Subject: 40MW PV Plant associated with the Tubatse Ferrochrome Plant - I&AP Registration

Dear Seshni

I hope this email finds you well.

Please see attached form requesting that I be registered as an I&AP for the abovementioned project.

If you could also kindly provide me with a copy of the latest project information available for public comment at this time, many thanks.

Kind regards

Subject: EIA and WUA for the 40MW PV Plant across various sites associated with the Samancor Chrome TFC Plant, Steelpoort, Fetakgomo Tubatse Local Municipality

Dear Stakeholder

Notice is hereby given in terms of the Environmental Impact Assessment (EIA) Regulations, 2014 (as amended) published in Government Notice Regulation (GNR) 324 - GNR 327, in terms of Section 24(5) of the National Environmental Management Act - NEMA (Act No. 107 of 1998) (as amended) and the National Water Act – NWA (Act No. 36 of 1998) (as amended) of the initiative by TFC Solar (Pty) Ltd, to apply for an Environmental Authorisation for a 40MW Photovoltaic (PV) Plant across Sites 2B, 3B, 3C, 4B and 5B associated with the Tubatse Ferrochrome Plant, Steelpoort, Fetakgomo Tubatse Local Municipality.

Royal HaskoningDHV has been appointed as the Environmental Assessment Practitioner and Public Participation Consultant to conduct the environmental processes for the aforementioned project. Please find attached a Background Information Document which provides details regarding the project as well as how you can become involved during the process.

In accordance with the Protection of Personal Information (POPI) Act, your details will be securely stored and will only be used to share information and provide updates for this project. If you wish to be removed from this database, please send an email to: seshni.govender@rhdhv.com.

Dear Stakeholder

Notice is hereby given in terms of the Environmental Impact Assessment (EIA) Regulations, 2014 (as amended) published in Government Notice Regulation (GNR) 324 - GNR 327, in terms of Section 24(5) of the National Environmental Management Act - NEMA (Act No. 107 of 1998) (as amended) and the National Water Act – NWA (Act No. 36 of 1998) (as amended) of the initiative by TFC Solar (Pty) Ltd, to apply for an Environmental Authorisation for a 40MW Photovoltaic (PV) Plant across Sites 2B, 3B, 3C, 4B and 5B associated with the Tubatse Ferrochrome Plant, Steelpoort, Fetakgomo Tubatse Local Municipality.

Royal HaskoningDHV has been appointed as the Environmental Assessment Practitioner and Public Participation Consultant to conduct the environmental processes for the aforementioned project. Please find attached a Background Information Document which provides details regarding the project as well as how you can become involved during the process.

In accordance with the Protection of Personal Information (POPI) Act, your details will be securely stored and will only be used to share information and provide updates for this project. If you wish to be removed from this database, please send an email to: seshni.govender@rhdhv.com.

Dear Stakeholder

This serves as a reminder to send through any comments that you may have for the above mentioned project, comments are due on or before the 06th of December 2023.

The report is available electronically on the following link:
<https://www.royalhaskoningdhv.com/en/countries/southern-africa/environmental-reports>

Hard Copies of the report can be found at the following locations:

- Mapodile Public Library;
- Burgersfoort Public Library; and
- Tubatse Ferrochrome Smelter Office.

In accordance with the Protection of Personal Information (POPI) Act, your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).

Regards

Seshni Govender (Pr. Sci. Nat., EAPASA)

Dear Pastor Bardenhorst

The draft Environmental Scoping Report for the above mentioned project is now available for review and comment from the 07th of November 2023 – 06th of December 2023.

The report is available electronically on the following link:

<https://www.royalhaskoningdhv.com/en/countries/southern-africa/environmental-reports>

Hard Copies of the report can be found at the following locations:

- Mapodile Public Library;
- Burgersfoort Public Library and
- Tubatse Ferrochrome Smelter Office.

In accordance with the Protection of Personal Information (POPI) Act, your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).

Dear Stakeholder

This serves as a reminder to send through any comments that you may have for the above mentioned project, comments are due on or before the 06th of December 2023.

The report is available electronically on the following link:
<https://www.royalhaskoningdhv.com/en/countries/southern-africa/environmental-reports>

Hard Copies of the report can be found at the following locations:

- Mapodile Public Library;
- Burgersfoort Public Library; and
- Tubatse Ferrochrome Smelter Office.

In accordance with the Protection of Personal Information (POPI) Act, your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).

Regards

Dear Stakeholder

Please find attached latest correspondence regarding the project.

The draft Environmental Scoping Report for the above mentioned project is now available for review and comment from the 07th of November 2023 – 06th of December 2023.

The report is available electronically on the following link:
<https://www.royalhaskoningdhv.com/en/countries/southern-africa/environmental-reports>

Hard Copies of the report can be found at the following locations:

- Mapodile Public Library;
- Burgersfont Public Library and
- Tubatse Ferrochrome Smelter Office.

In accordance with the Protection of Personal Information (POPI) Act, your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).

Dear Stakeholder

ENVIRONMENTAL IMPACT ASSESSMENT (EIA) AND WATER USE AUTHORISATION (WUA) PROCESS FOR A 40MW PHOTOVOLTAIC PLANT ACROSS SITES 2B, 3B, 3C, 4B AND 5B ASSOCIATED WITH THE TUBATSE FERROCHROME PLANT, STEELPOORT, FETAKGOMO TUBATSE LOCAL MUNICIPALITY

In 2021, a Special Purpose Vehicle (SPV), TFC Solar (Pty) Ltd (hereafter referred to as TFC Solar, proposed the development of a Solar PV facility of up to 100 Megawatt (MW) generation capacity over five (5) sites: 1, 2, 3, 4 and 5. These five (5) sites were subject to an Environmental Impact Assessment (EIA) and an Environmental Authorisation (EA) was granted on 25 April 2022 from the Department of Forestry, Fisheries and the Environment (DFFE) (DFFE Ref: 14/12/16/3/3/2/2079). A General Authorisation was received from the Department of Water and Sanitation on 28 March 2022. Site 1 is no longer considered for the Solar PV development.

A total of 60MW output can be achieved from the previously authorised Sites 2 – 5. Additionally, TFC Solar, propose the development of a 40MW Solar PV facility to be developed on Site 2B, 3B, 3C, 4B and 5B. All previously authorised Sites 2, 3, 4 and 5 as well as new Sites 2B, 3B, 3C, 4B and 5B would achieve a total of 100MW.

The subject of this Environmental Scoping Study (ESS) includes the following key components:

- Development of a PV plant over the selected potential sites including mounting structures, inverters, on-site transformers and substations, instrumentation and control;
- 33kV overhead powerlines and underground cables between the various sites linking up to either the Tubatse East or the Tubatse West substations;
- Battery Energy Storage System (BESS) either lead-acid or lithium-ion; and
- Ancillary infrastructure such as construction laydown area/s, water pipelines and storage tanks, internal access roads, fencing, gates and access control.

The draft Environmental Scoping Report is now available for review and comment from the 07th of November 2023 – 06th of December 2023. Please can we have comments on or before the 06th of December 2023.

The report is available electronically on the following link:

<https://www.royalhaskoningdhv.com/en/countries/southern-africa/environmental-reports>

Hard Copies of the report can be found at the following locations:

- Mapodile Public Library;
- Burgersfoort Public Library and
- Tubatse Ferrochrome Smelter Office.

In accordance with the Protection of Personal Information (POPI) Act, your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).

Dear Stakeholder

This serves as a reminder to send through any comments that you may have for the above mentioned project, comments are due on or before the 06th of December 2023.

The report is available electronically on the following link:
<https://www.royalhaskoningdhv.com/en/countries/southern-africa/environmental-reports>

Hard Copies of the report can be found at the following locations:

- Mapodile Public Library;
- Burgersfoort Public Library; and
- Tubatse Ferrochrome Smelter Office.

In accordance with the Protection of Personal Information (POPI) Act, your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).

Dear [REDACTED]

Please find attached latest correspondence regarding the project,

The draft Environmental Scoping Report for the above mentioned project is now available for review and comment from the 07th of November 2023 – 06th of December 2023.

The report is available electronically on the following link:
<https://www.royalhaskoningdhv.com/en/countries/southern-africa/environmental-reports>

Hard Copies of the report can be found at the following locations:

- Mapodile Public Library;
- Burgersfoort Public Library and
- Tubatse Ferrochrome Smelter Office.

In accordance with the Protection of Personal Information (POPI) Act, your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).

Dear Stakeholder

ENVIRONMENTAL IMPACT ASSESSMENT (EIA) AND WATER USE AUTHORISATION (WUA) PROCESS FOR A 40MW PHOTOVOLTAIC PLANT ACROSS SITES 2B, 3B, 3C, 4B AND 5B ASSOCIATED WITH THE TUBATSE FERROCHROME PLANT, STEELPOORT, FETAKGOMO TUBATSE LOCAL MUNICIPALITY (REF: 12/1/1/9/2-GS88)

In October 2023, Notice was given in terms of the EIA Regulations, 2014 (as amended) published in Government Notice Regulation (GNR) 324 - GNR 327, in terms of Section 24(5) of the National Environmental Management Act - NEMA (Act No. 107 of 1998) (as amended) and the National Water Act – NWA (Act No. 36 of 1998) (as amended) of the initiative by TFC Solar (Pty) Ltd, to apply for an environmental authorisation for a 40MW Photovoltaic (PV) Plant across sites 2B, 3B, 3C, 4B and 5B associated with the Tubatse Ferrochrome Plant, Steelpoort, Fetakgomo Tubatse Local Municipality. An EIA study was initiated, and the final Environmental Scoping Report was accepted by the Limpopo Department of Economic Development, Environment and Tourism (LEDET) on 31 January 2024.

The subject of this draft Environmental Impact Assessment Report (EIAR) includes the following key components:

The PV plant will consist of the following infrastructure:

- Solar PV panels that will be able to deliver the required 40MW output to the Samancor grid;
- Inverters that convert direct current (DC) generated by the PV modules into alternating current (AC) to be exported to the Samancor electrical grid;
- Transformer/s that raises the system AC low voltage to medium voltage. The transformer converts the voltage of the electricity generated by the PV panels to the correct voltage for delivery to the TFC Plant;
- Transformer substation; and
- Instrumentation and Control consisting of hardware and software for remote plant monitoring and operation of the facility.

Associated infrastructure includes:

- Mounting structures for the solar panels in a fixed tilt or rotating tracking configuration;
- Cabling between the structures, to be laid underground where practical;
- 33kV overhead powerlines between the various sites and the Tubatse East and -West substation buildings;
- Two switching stations at Site 2B and 3B as well as transformer yard at each PV site;
- Containerized switchgear substation at Tubatse East and -West MV substations for connecting to the Tubatse substation busbars;
- Water provision infrastructure (i.e. pipeline/s, storage tank/s, etc.) for PV panel cleaning; and
- Internal access roads (typically 6m) roads will be constructed, but existing roads will be used as far as possible, fencing (approximately 3m in height), gates and access control.

The draft EIAR is now available for review and comment from the 27 March 2024 – 30 April 2024. Please submit comments on or before the 30 April 2024. Additionally, an open day will also be held, details are provided below.

The report is available electronically on the following link:

<https://www.royalhaskoningdhv.com/en/countries/south-africa/environmental-reports>

Hard copies of the draft EIAR can be found at the following locations:

- Mapodile Public Library;
- Burgersfoort Public Library and
- Tubatse Ferrochrome Smelter Office.

Open Day:

Date: 09 April 2024

Time: 14:00-17:00

Venue: Tubatse Chrome Club, Tubatse Residence, R555, Steelpoort, 1133

In accordance with the Protection of Personal Information (POPI) Act, 2013 (Act No. 4 of 2013), your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).

Attachments: EIA Notification F01.pdf

Dear Stakeholder

Please find attached the latest correspondence regarding the project.

The draft Environmental Impact Assessment Report is available for review, review and comment from the 27th of March 2024 – 30th of April 2024.

The report is available electronically on the following link:
<https://www.royalhaskoningdhv.com/en/countries/south-africa/environmental-reports>

Hard Copies of the report can be found at the following locations:

- Mapodile Public Library;
- Burgersfoort Public Library and
- Tubatse Ferrochrome Smelter Office.

In accordance with the Protection of Personal Information (POPI) Act, your contact details will only be used to record any comments that have been provided as part of the process as well as to provide updates on the progress of the project, identifying information will only be shared with the Competent Authority to provide proof for the Public Participation process as required according to Chapter 6 of the EIA Regulations, 2014 (as amended).
